

with the innovation blockchain , which decentralized the way we store data and information management..

Blockchain enables the creation of digital currencies like bitcoin, ethereum, usdt etc . As blockchain technology becomes widely adopted, centralized authorities, such as governmental agencies and large multinational corporations, could lose the ability to control and shape the activities of disparate people through existing means.

Making The Transition Into Cryptocommerce Peaceful

we conclude that can transition into a decentralized world of cryptographic where there is widespread adoption of cryptocurrencies because it's solution to hyperinflation.

the pros of cryptocommerce to buyer

- As there are no intermediaries, prices are cheaper.
- Most apps are for sharing expenses or finding second-hand products, which still makes them cheaper channels.
- In one place you can find many different options for what you are looking for.

the pros of Cryptocommerce to seller

- It is not necessary to pay to advertise, as it will appear as one more option.
- The number of buyers who can get to see the product or service offered is quite large, especially in the successful Marketplace.
- In the cryptocommerce there is no need to pay commissions to intermediaries
